

Numéro d'inventaire: 22697

Filtres à bande

ARO P 480/1250 E2

Données techniques

Contenance du réservoir	250 l
Débit	80 l/min
Largeur de filtre de papier	480 mm
Branchement 50 Hz 3x	400 Volt
Longueur	1700 mm
Largeur	620 mm
Hauteur	690 mm

belt filters, process or processing fluids such as emulsions, water, oils and solutions can be efficiently cleaned of the solids they contain. The uniquely deep filter bed allows a higher liquid level than with conventional flat bed belt filters. The deflection on the discharge side is set higher, resulting in a drying section. Therefore a very compact filter cake can be built up with our belt filter in connection with a powerful filter fleece. This combination results in an excellent filtration result with low consumption of filter fleece and the smallest possible liquid discharge.
